Office Note 4th the Da on hr

Branch General (Education)

Subject Letter No 10483/438 & the 30th May 1904 from the Dpt of Edn in Inspn Requesting that the first batch of 5 School masters who have already undergone training at Jata's Experimental Silk Farm at Bangalore may be appointed as Sericultural Inspectors in their Taluks on Rs 20 each per mensem—

The Dpt also recommends that each of the 5 masters may be supplied with the necessary implements costing between Rs 5 and 6, some quantity of good Cocoons from the Farm and a leather bag to carry the above articles

The cost is proposed to be met from the "Local Funds General" and if it is sanctioned the necessary provision will have to be included in the Industrial Schools Budget for 1905-05 which is now under circulation

Subd Vide 11 Min

Put up the order we passed the other day on objects report of the training of the 5 teachers. Also the file re calling over the Mr Salaried Farm Asst. today from the Deccan

17-6-07

The order as well as the file referred to, to put up

KM
14/6/07

In the above order, Govt. expressed the hope that the trained teachers will put the knowledge they have gained to good use and, in improved methods of village silk worm rearing for this point, & as regards forwarding the teachers with Japanese implements the D Cl's recommendations were invited.

In the letter under disposal, Mr Bhatia has already furnished detailed recommendations, which seem well considered & to be calculated to further the object which the Govt has in view. (~~Being desirous of appointing to place the Sericultural Inspectors under the Board~~) The extra cost will not be much, that is to say, it will amount to Rs 5 x 20 or Rs 100 a month for pay of the Inspectors, & an initial cost of about Rs 10 ~~[illegible]~~ for each or Rs 50 for all. The proposals made may perhaps be limited to a couple of years, at the end of which, the Deputy Commissioner may report the result to Govt. when the question

Which, I find, was duly carried today K

7v

Rs 5 to 6 for implements besides cost of leather bags, ~~[illegible]~~ coolies, &c may cost something K

Letter No 1362 dt the 8th August 1904 from the Rev Commr in Mysore Submitting ~~the~~ his opinion regarding the appointment of Sericultural Inspectors —

The Rev Commr suggests that the appointment of Sericultural Inspectors may be sanctioned tentatively for one year, at the end of which the Dy Commrs of Districts to which the Inspectors ~~may be~~ are posted, may be requested to submit a report on the results achieved during the year. He also adds that the Sericultural Inspectors may be placed under the immediate orders of the Asst Commr in charge of Taluks instead of under Amildars as proposed by the Inspr Genl of Cos.

The proposal as already stated involves an additional cost of

The experiment is well worth a trial We have on our hands some trained & qualified men Each They are to be employed, each in his own Taluk, and to be given 20 Rs a month with certain check abbliances. At the same time, they are to be relieved of their duties as Village Schoolmasters

Serial No

as otherwise they could not be of much use to the public. The instruction imparted in the Farm is excellent and it behoves us to make the best possible use of it, provided the cost is not prohibitive. Another batch of (Village school masters) is now undergoing instruction in the Farm; & during my recent visit to the Farm the other day, I was greatly pleased to see that they progress made was highly satisfactory. Mere training without opportunities of putting it to good account would be money thrown away. The Educ. Proposal is a good one and the Revenue Commissioner deems agreeable. Sanction may be given accordingly subject to a report at the end of a year as to

OFFICE OF INSPECTOR GENERAL OF EDUCATION IN MYSORE

No 10483/438 Genl 1 Camp ~~Lingadore~~ Nandidrug, 30 May ~~190~~ 1904

From

H J BHABHA Esq MA,
Inspector General of Education in Mysore

To

L Anantaswamy Rao Esqre B A,
Offg Secretary to the Government of His Highness
the Maharaja of Mysore, in the General and
Revenue Departments

SIR,

I have the honour to inform you that the five village masters whose names designations and pay are given below passed a creditable examination at the end of March 1904 in the rearing of silkworms mulberry cultivation, detection by means of the microscope and eradication of the common infectious diseases in seeds, and reeling A copy of the Certificate given to each teacher after the examination is appended to this letter

Name	School	Taluk	Pay
D SubbaRao	Tyamgondlu A V School	Nelavangala	10
M Ramaswamy Ayangar	Hirganur Hobli School	Channapatna	12
D Narasimha murti	Ambasapura Hobli School	Devanahalli	10
A D SubbaRao	Handignal Hobli School	Hoskote	10
Narain Rao	Chikmuduvadi Hobli School	Kankanhalli	12

2 These teachers have returned to their schools

from the 1st April 1904 All of them are enthusiastic and have taken interest in learning the Japanese methods of _ silk industry It is not possible to do much for the silk industry in their Talukas unless they are relieved of school work, and sent out as Itinerant Sericultural Inspectors to go from village to village and test the seeds by means of a microscope Round about Tyamgondlu for instance there are 22 villages in which silk rearing is practised It is impossible that one trained teacher can visit frequently or even once in a year so many villages without prejudice to his school work

3. I recommend that these trained teachers may be relieved of school work altogether and employed as Sericultural Inspectors in their Talukas They should each be provided with a serviceable microscope, Japanese nets, a chopper and other necessary implements which will cost from Rs 5 to 6, a supply of good Cocoons from the Talak's Silk Farm &c, and a leather handbag to carry these articles from village to village They will itinerate from village to village for not less than 20 days in a month and keep a Register and diary of their work with full details in a prescribed form which will be attested by the Patel of each village and the ryots to whom help is given by them. They should submit these registers and diaries of work every month to the Amildar. I recommend that they may be paid Rs 20 a month

from the Local Funds General, and ordered to work under the Amildars Their pay should be sufficient to provide them with good food during their itinerations and compensate them for all the inconveniences of constantly moving from place to place Whatever difficulties and questions that may arise in the course of their duties they should refer for solution and advice to the Superintendent of Mr Tata's Farm They should also sell healthy seed cocoons reared in the Farm to the ryots, also the Japanese nets and other implements, of which a stock may be kept for sale in Mr Tata's Farm They should also be allowed from time to time to revisit the Farm in order to solve their own difficulties or learn something more than they know at present

4 It seems to me that the sericultural inspectors will be of great help in improving and developing silk industry in Mysore and increasing the wealth of the ryots engaged in it The silk industry is eminently suited as a cottage industry which will give work to the male ryots out of the agricultural season and to the female members of their families the whole year round It is fraught with

with immense possibilities of enriching the ryots and adding to the material resources of the State If the Government will take over Mr Tata's Farm as a Sericultural School, and train Sericultural Inspectors in it for the Province as proposed by me in my letter No $\frac{8935}{338}$ dated 20th March 190 the cost of the school as well as employing Sericultural Inspectors will be recovered a thousand fold in course of time and the happiness of the ryots will materially increase, thanks to the late Mr Tata's liberal and philanthropic enterprise in introducing the Japanese methods into Mysore

I have the honour to be,
Sir,
Your most obedient servant,

H J Bhabha
Inspector General

Ed E-14-1904-05 SL (1)

(5) Tatas Silk Farm
Bangalore 21st March 1904

This is to certify that has undergone sericultural training at the Tatas Silk experimental Farm, Bangalore for a period of six months, during which time he has been instructed in the Japanese methods of rearing silkworms, of the cultivation of the mulberry plant and of the detection of silkworm diseases by means of the microscope He has acquired sufficient practical knowledge in all the three departments, and the result of the practical examination in these subjects has been satisfactory. He has also learnt reeling at the Farm

I have been satisfied with his conduct and progress during the period of his training
